## **H1N1 VACCINATION EFFORTS CONTINUE IN WICOMICO COUNTY** **Community Update #5**

(Salisbury, MD) The Wicomico County Health Department (WiCHD) continues to expand H1N1 flu vaccination efforts in priority populations throughout the county. To date, the health department has administered a total of **4,662** doses of the H1N1 vaccine. A total of **2,619** doses of H1N1 intranasal vaccine have been administered. **1,811** doses of injectable H1N1 vaccine have been administered to those 3 years of age and older and **232** doses of injectable (.25ml) H1N1 vaccine have been administered to those 6 months to 35 months of age. Last week, health department officials conducted **5** public H1N1 flu clinics and focused additional vaccination outreach into local daycares, public and private schools, EMS providers, and Salisbury University's nursing and allied health students, administering a total of **867** H1N1 vaccinations.

Into this week, the health department will continue to conduct H1N1 flu clinics for priority populations on a daily basis as vaccine continues to become available. Health department officials are encouraging individuals to check with their primary care doctor about vaccine availability before scheduling with the health department, as many local doctors now have supplies. Priority populations for the H1N1 flu vaccination clinics continue to include:

- pregnant women,
- persons who live with or provide care for infants under 6 months of age,
- individuals age 6 months-to-24 years of age,
- individuals age 25 to 65 with an underlying medical condition.
